

KMWB-TV in Minneapolis and Sinclair Broadcasting, in airing a blatantly one-sided political piece without providing a similar block of time for a response, are violating the trust in the public airwaves loaned to them via their licenses. This amounts to a colossal campaign contribution from these corporations. Their licenses need to be carefully reviewed and these corporations need to be informed that their current actions are in violation of their license for the use of this valuable public trust.

Due to the time left to stop this abuse, they must be informed immediately that their licenses are about to be suspended or revoked so they have time to change their actions toward actions that serve the public trust.
